Topics

Bot Introduction
Architecture overview & integration options

Comparisons	Bots In action
Frameworks strengths & weaknesses	Simple code walk thru & project set up

Framework concepts
Channel, conversation, dialog, context...

Bot design guidelines	Bot use cases
	Data capture, assistance, action request....

RINGLEADER SOLUTIONS

Expected Takeaways

Hands on Example
- Relate bot concepts and design back to your business challenges
- Get a feel for MS Bot Framework
- Familiarise with common use cases

Developer considerations
- Experience some pattern usage and coding examples (code is downloadable)
- Leverage ASP.NET WebAPI skills
- Getting an understanding of NLP with MS LUIS

Tailored Q&A
- Some considerations around your project specific challenges
- Understanding of best practices.

Brown bag sessions start with a quick discussion around required takeaways which can be further refined in the Q&A sections

RINGLEADER SOLUTIONS

How does it work?

Ring Leader Brown Bag Format
- Fully interactive (often with role play)
- 50% presentation 50% white-boarding
- Demo code available for download

Logistics
- Onsite with Wi-Fi & laptop presentation facilities
- White boards for brainstorming (optional)
- No flash photography

Recommended Audience
- Developers with an interest in bot an mobile development
- Architects with an interest in distributed frameworks and design pattern adoption
- Development managers weighing the pros and cons for Bot framework investment

Your Brown Bag facilitators are:

Ben Arroyo
UI Evangelist

Please contact Oscar Musat to tailor and schedule your session.
